

Change of Part Number Identification Method

Type of Change:

- Engineering Part Number
 Product Appearance

The method of part number identification will change from pad printing to laser marking.

This change will affect the following products:

All **B Series** toggles, including custom products, except of locking lever and threaded bushing models.

All **BB Series** pushbuttons, including custom products.

Method of Part Number Identification	
Before Change	After Change
Method: Pad printing	Method: Laser marking

- No change to dimensions.
- Contact factory for further details.

Effective Date

Change will be effective with July 2012 production.
