## S Series

# Change to Method of Identification for S Toggles with Flat Lever

Type of Change:

- Engineering     Part Number  
 Product         Appearance

Example of S331R before change to method of identification on switch case

Before Change	After Change
Printing	Label

The process by which a switch is identified on the switch case will be changing. Previously, identification had been printed on the case, but the method will be revised to application of a label. The logo will also be updated on the label. These changes will effect both standard and custom products for the S Toggles with flat levers. The table below lists the standard part numbers that will be effected, and the table on the following page displays examples of identification before and after the change .

Part Numbers Effected by the Change to Identification Labels					
S41R	S43R	S49R	S331R	S333R	S339R
S42R	S48R	S116R	S332R	S338R	

### Note

There may be a mix of previous and updated methods of identification on switches until the transition is complete. Visit NKK Switches' website or contact the factory if more information is needed.

### Effective Date

Changes to method of identification on switch cases will be effective March 2015.
